

Senior Full Stack Engineer (AI Hiring Platform)

Location: Bengaluru, India (Hybrid)

Experience: 3–5 years

Employment Type: Full-time

About the Role

We are building an AI-powered Talent Screening and Interview Intelligence Platform that helps recruiters automatically analyze job descriptions, scrape public candidate profiles, rank candidates using semantic matching, conduct asynchronous AI-assisted video interviews, and generate structured hiring scorecards.

Responsibilities

- Build scalable web applications using React, Next.js, TypeScript, and Node.js.
- Design REST APIs and background workers for candidate scraping and processing.
- Implement semantic candidate scoring using embedding models or LLMs.
- Integrate public profile scraping with pagination, retry logic, exponential backoff, and partial-result handling.
- Build recruiter dashboards showing candidate pipelines, score breakdowns, interview status, and comparisons.
- Develop secure authentication and role-based access control.
- Optimize PostgreSQL queries and Redis-backed job queues.
- Deploy services on Railway and maintain CI/CD pipelines.
- Collaborate with designers and product managers to improve recruiter workflows.

Required Skills

- React, Next.js, TypeScript
- Node.js and Express
- PostgreSQL
- Redis
- Docker
- Git and GitHub
- REST APIs
- Basic understanding of AI/LLMs and vector embeddings
- Web scraping using Playwright or Puppeteer
- Strong debugging and communication skills

Preferred Skills

- Expo / React Native
- Whisper speech-to-text
- Python
- Background job processing
- Railway deployments

Experience

- 3–5 years in full-stack development
- Experience building production web applications
- Experience integrating third-party APIs
- Familiarity with scalable backend architecture

Nice to Have

- Experience with recruitment software, ATS platforms, HR Tech, or AI-based hiring systems.
- Knowledge of semantic search, embeddings, or recommendation systems.

Benefits

- Flexible hybrid work
- Learning allowance
- Health insurance
- Modern engineering stack
- Opportunity to work on applied AI products
